Genesol UF 2

Acidic U.F. Membrane Cleaner Removes Metal Oxides and Inorganic Scales
"Genesol UF 2 is a low foaming, multicomponent, acidic, UF membrane cleaner formulated with Osmotic Action to remove carbonate scales and metal oxides."

Typical properties

Appearance: White powder

pH of a 1% Solution: 2.0

Bulk Density: 1.3-1.4g/cm³

Freezing point: N/A

Application of Genesol UF 2

Genesol UF 2 Antiscalant Chemicals in BD is highly effective when used as a 1%-2% solution with alternating cycles of circulation and soaking for periods of 2-3 hours. Genesol UF 2 will clean effectively at ambient temperature. The high ionic strength solution creates an Osmotic effect which helps break up and release deposits from the surface and so allow the active ingredients to work more effectively. After cleaning, the membrane system should be flushed with permeate water until reaching neutral pH. Genesol UF 2 is readily dissolved in water.

Health and Safety

Genesol UF 2 is a complex of chelating acids and osmotic agents which is classified

as non-toxic. Low pH solutions are corrosive against carbon steels and concrete so pumping equipment, piping and storage tanks must be constructed of acid-resistant materials. Observe all safety precautions detailed in the Material Safety Data Sheet which is available upon request
